

Services Proposal

Financial Technology Advisory Services

A practical partner for payments, embedded finance, alliance banking, risk management and implementation delivery.

Who we are

FTAS brings structure to financial technology execution.

Financial Technology advisory services (FTAS) is a specialist advisory and implementation partner positioned at the intersection of financial services, payments infrastructure, risk management, commercial modelling and delivery execution.

Our value proposition

- Translate financial infrastructure into a practical roadmap.
- Align commercial, risk management, operational and technical workstreams.
- Create board-ready artefacts and implementation-ready packs.

The problem we solve

Bank–fintech partnerships are slow, costly and high-risk to launch.

6–18 months

Typical time to launch a compliant bank–fintech partnership on legacy integration.

3.2×

Faster product–market fit when built on proven Banking-as-a-Service models.

74%

Of financial incumbents are constrained by technical debt and partner-risk complexity.

Scarce skills

Few advisors understand SA's sponsor-bank, BIN-sponsorship and risk control models.

Most partnership failures are not technology failures — they are gaps in structuring, governance and partner alignment.

What we can help your company solve

Common needs we support through advisory, governance and delivery.

We want to launch a payment or embedded finance product

Product feasibility, operating model, partner model and go-live roadmap.

We need bank, PSP or technology partners

Partner evaluation, risk control model, commercial comparison and contracting support.

We need a better understanding of Alliance Banking and Strategic Partnerships

Model development, execution assistance, training and partner matching

Our project is stuck between business and technology

Implementation PMO, issue tracking, decision forums and dependency management.

We need pricing and commercial confidence

Waterfall model, revenue share, fees, cost drivers and break-even analysis.

How we work with you

A clear path from current-state assessment to executable delivery.

Discover

Understand the business objective, existing capability, risks and constraints.

Design

Develop the operating model, partner model, controls, economics and roadmap.

Implement

Coordinate workstreams, value chain, milestones, testing and go-live readiness.

Govern

Embed reporting, policies, decision logs, risk registers and management packs.

Outcome: a managed engagement with visible deliverables, decision points, dependencies and executive-level reporting.

Business model

Complementary revenue lines across the full partner lifecycle.

Advisory projects

Fixed-fee strategy, regulatory and architecture engagements scoped to each client.

Retainers

Ongoing partner-lifecycle governance, monitoring and compliance support.

Training academy

Structured academies and modular programmes delivered to in-house teams.

Value & success fees

Outcome-based fees linked to launch milestones and partnership performance.

Revenue blends project, recurring and outcome-based fees — becoming more recurring as retainers and the academy scale.

Training academies

Ten specialist academies covering the full alliance banking, embedded finance, financial modelling and payments curriculum.

Financial Training Academy

Core financial services foundations for banking and fintech teams.

Banking Masterclass

Deep-dive banking operations and products.

Alliance Banking Academy

Sponsor bank, BIN sponsorship and partner ecosystem models.

Embedded Finance Academy

Embedding financial products into non-bank platforms.

Banking-as-a-Service Academy

BaaS operating models, risk and commercial design.

FinTech Strategy Academy

Market positioning, partnerships and commercialisation.

Digital Banking Transformation Academy

Modernising banking platforms and operating models.

Payments Academy

South African payments landscape, products and innovation.

Key programmes

Modular programmes that build capability across the alliance banking, embedded finance and payments lifecycle.

Alliance & Embedded Finance

- Alliance Banking Foundations
- Building an Alliance Banking Business
- Embedded Finance Fundamentals
- Embedded Finance Strategy Masterclass
- Embedded Finance Operating Model

Banking-as-a-Service

- Banking as a Service Fundamentals
- Sponsor Bank Operating Models
- BaaS Operations
- Emerging crisis management
- Stress testing methodologies
- Liquidity, capital & operational stress tests
- Strategic integration

FinTech & Digital Strategy

- FinTech Ecosystem Masterclass
- FinTech Partnerships & Commercialisation
- Digital Banking Strategy
- Future Banking Models
- Open Banking Fundamentals
- API Economy & Banking Innovation

Payments & Conduct

- South African Payments Landscape
- Payments Innovation Masterclass
- The Future of Banking

All programmes are delivered as instructor-led or blended formats and can be tailored to in-house teams.

Commercial and financial architecture

We turn pricing and revenue assumptions into decision-ready models.

Core modelling areas

- Revenue waterfalls and margin splits
- Transaction fees, scheme costs and processor economics
- Funding rates, discounting, repayment terms and default assumptions
- Break-even and sensitivity analysis
- Management reporting packs and scenario views

Illustrative commercial waterfall

Engagement options

Flexible structures depending on your internal capacity and urgency.

Focused advisory sprint

2–4 weeks

Defined question, diagnostic, recommendations and board-ready output.

Implementation PMO

Monthly retainer

Managed execution support across partners, suppliers, governance and milestones.

Project workstream

6–12 weeks

Specific product, partner, commercial or architecture deliverable.

Strategic retainer

Monthly retainer

Ongoing advisory, management packs, training and periodic reviews.

Our team

Experienced leadership. Proven expertise. Building the future of fintech.

Philicia Robinson

MBA, BA (Hons) and RE5 Qualification

- Extensive experience in financial services, strategic partnerships and regulatory environments
- Strong background in strategy, governance and compliance
- Drives structured growth and ecosystem alignment

Abigail Headbush

CA(SA)

Chief Financial Officer

- Chartered Accountant with deep financial and fintech expertise
- Experience in structuring, scaling and financial operations
- Focused on building sustainable, high-margin platform models

FINANCIAL EXPERTISE

Deep understanding of financial services and capital markets

PLATFORM EXECUTION

Proven ability to build, scale and operationalise technology platforms

BANKING EXPERIENCE

Executive level banking experience

Proposed next steps

1. Confirm priority business objectives and decision deadlines.
2. Agree the most suitable engagement module/ partnership agreement.
3. Hold a working session to define scope, deliverables and timelines.
4. Submit a formal proposal and commercial terms.

Thank you
